

transforming  
color into solutions  
that shape  
everyday life.

A multi-brand industrial group  
delivering advanced inks, coatings and  
energy-efficient building solutions.

# who we are

DRUCKFARBEN Group is a Greek-founded industrial group with international presence, specializing in inks, coatings and energy-efficient systems.

For more than five decades, the Group has built a reputation for technical expertise, reliability and long-term partnerships with customers across Europe, the Middle East and Africa.

Today, DRUCKFARBEN Group operates through three distinct and complementary brands:

- > **DF Inks**: printing inks and coatings for flexible packaging and labels
- > **KRAFT Paints®**: architectural paints, mortars and decorative coatings
- > **BIOCLIMA®**: advanced thermal insulation systems

Together, these business units reflect the Group's commitment to innovation, sustainability and industrial excellence.

# our purpose

Color, chemistry and materials shape the world around us.

At DRUCKFARBEN Group, our purpose is to develop solutions that:

- > Improve everyday products and spaces
- > Support our partners' growth
- > Contribute to a more sustainable future

Whether through packaging that protects food, paints that transform homes, or systems that improve energy efficiency, our technologies touch millions of lives every day.

# our business units

## **DF Inks**

Solutions for the flexible packaging and label printing industry. DF Inks develops high-performance solvent-based and water-based inks, coatings and auxiliaries for flexographic and rotogravure printing. Continuously innovating with solutions for mono material packaging, direct food contact and recyclability. Applications include food packaging, beverages, hygiene products, pharmaceuticals and industrial packaging.

## **KRAFT Paints®**

A leading brand in architectural paints, mortars and decorative finishes such as enamels and varnishes. KRAFT Paints® combines color innovation, design inspiration and durable coatings technology, offering a complete range of solutions including tile adhesives, floor protection systems, waterproofing materials and repair mortars - providing solutions for every need in new construction, repair or renovation, for both professionals and consumers.

## **BIOCLIMA®**

BIOCLIMA® provides advanced external thermal insulation systems, engineered to deliver high-performance energy upgrade and long-term durability. Designed to enhance building efficiency and sustainability, BIOCLIMA® certified systems contribute to improved indoor comfort and reduced energy consumption, while supporting compliance with major green building certification schemes.

# international presence

The Group maintains a strong presence across South-Eastern Europe and international markets.

Production and distribution network includes:

- > Greece
- > Romania
- > Bulgaria
- > Serbia
- > Cyprus
- > Nigeria

This regional footprint enables the Group to provide localized service, technical expertise and efficient logistics to partners across multiple markets.

TRANSFORMING COLOR INTO SOLUTIONS  
THAT SHAPE EVERYDAY LIFE.

# industrial infrastructure

DRUCKFARBEN Group operates modern production facilities equipped with advanced technology and strict quality control.

Key facilities include:

- > Ink production plants in Aspropyrgos and Chalkida (Evia)
- > Paints and mortars production and logistics facilities in Aspropyrgos
- > International production sites in Romania and Nigeria

Continuous investments in equipment, automation and laboratories ensure consistent product quality and operational efficiency.

# research & innovation

Innovation  
is at  
the core  
of the  
Group's  
strategy.

Our R&D laboratories and technical teams focus on:

- > New ink formulations
- > Sustainable coatings
- > Advanced raw materials
- > Packaging recyclability
- > Energy-efficient construction systems

Through collaboration with customers, suppliers and industry organizations, the Group translates R&D developments into practical industrial solutions.

# product highlights

Across its three business divisions, DRUCKFARBEN Group develops products designed to address evolving industry needs, from sustainable packaging and high-performance coatings to energy-efficient building systems.

Innovative  
Solutions  
Across  
Our  
Business  
Units

# DF INKS

## advanced solutions for sustainable packaging

DF Inks develops innovative ink and coating technologies that help converters meet the growing demands of print performance, regulatory compliance and packaging sustainability.

## PU Ultima series

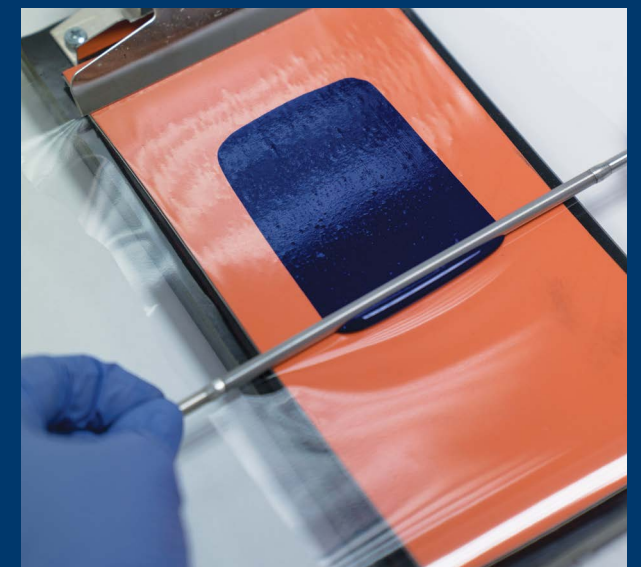

A next-generation polyurethane ink technology designed for flexographic and rotogravure printing. The PU Ultima series offers outstanding printability, strong adhesion and high resistance properties, while supporting modern packaging requirements including NC-free & PVC free formulations and improved recyclability compatibility.

## carbon-free black inks

Innovative ink formulations developed to improve packaging recyclability. Traditional carbon black inks can interfere with infrared sorting technologies in recycling facilities. By using alternative pigment systems, DF Inks contributes to better detection and improved recycling of printed substrates.

## water-based barrier coatings

Environmentally responsible coatings designed to provide grease resistance and water resistance for paper-based packaging applications. These coatings enable the development of reduced-plastic packaging structures, supporting circular packaging solutions.

DRIVEN BY INNOVATION

KRAFT Paints combines advanced coating technology with color expertise to deliver durable and high-quality solutions for professionals and consumers.

high-performance coatings  
for modern living

## master interior paint

Premium interior paint offering high coverage, durability and superior finish, designed to deliver long-lasting color performance in residential and commercial spaces.

## 4 seasons exterior paint

A high-resistance exterior coating engineered to withstand extreme weather conditions, providing long-term protection against moisture, UV radiation and temperature fluctuations.

## arterra patiti

Complete decorative coating system, microcement style technique for floors and walls.

## total proof waterproofing system

A comprehensive waterproofing solution designed to provide reliable protection against moisture and water penetration, ensuring long-term durability for roofs, terraces and exposed structures.

## climatop® face up

New technology silicone-based paint for ETICS renewal without “sealing” the surface or altering the texture of the render. It penetrates between the grains, it maintains its elasticity and creates a uniform, matte, and natural finish, while providing comprehensive protection against severe weather changes, sudden rainfalls, and pollutants.

BIOCLIMA-certified external thermal insulation systems meet every technical requirement of modern construction projects, contributing to major sustainability rating schemes such as BREEAM, LEED, and WELL. They actively support sustainable building practices while offering an expanded and enhanced product range.

Designed for durability and high energy efficiency, they have already become a trusted choice for large-scale technical projects.

## strong bond gel

Fiber-reinforced, one-component cementitious resin mortar, providing excellent adhesion for thermal insulation boards, such as expanded polystyrene (EPS), extruded polystyrene (XPS), rock wool (MW), high mechanical strength and flexibility. Its hybrid technology combines specially modified inorganic additives with synthetic macromolecular spherical water-swelling copolymers, which, when mixed with water, activate the Gel mechanism.

## climatop® weathersil

Fiber-reinforced ready-to-use silicone-based decorative finishing render in pasty form, offering a comprehensive protection against severe weather changes, sudden rainfall, pollutants, the growth of mold and algae on its surface and intense solar radiation.

# energy- efficient building systems

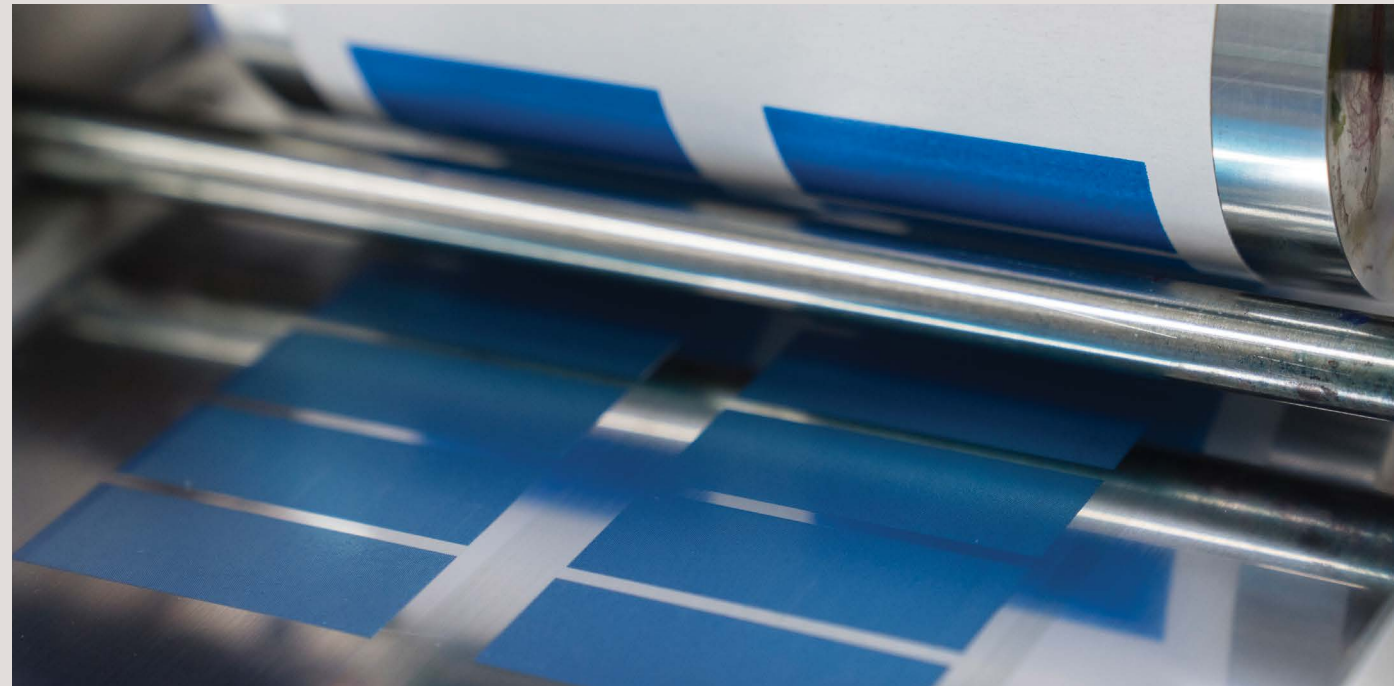

# color expertise

## Science, Technology and Precision Across Applications

Color development is a core scientific discipline within DRUCKFARBEN Group. Across all business units, our expertise combines pigment chemistry, formulation science, surface interaction and application engineering to deliver high-performance color solutions.

### Key capabilities include:

- > Spectrophotometric color measurement and formulation
- > Color strength optimization and pigment dispersion technology
- > Color stability under UV exposure, heat and chemical stress
- > Surface interaction control across plastics, paper, metals and mineral substrates
- > Color matching systems for industrial and architectural applications

## DF Inks – Color Accuracy for High-Speed Printing

In flexible packaging printing, color precision is critical for brand identity and production efficiency. DF Inks utilizes advanced color management systems and laboratory equipment including spectrophotometers, flexo and gravure proofing systems and analytical testing instruments to ensure precise Pantone reproduction and consistent ink transfer on press.

Our specialists support converters with:

- > color matching and shade consistency
- > anilox and substrate optimization
- > print performance testing and troubleshooting
- > formulation adjustments for high-speed printing environments

## KRAFT Paints® – Advanced Color Technology for Architectural Coatings

KRAFT Paints® combines pigment technology with advanced coating formulations to deliver high-opacity paints, durable finishes and long-lasting color stability. Digital color tools and mixing systems further enable professionals to achieve accurate color reproduction and consistent results across projects.

- > Inspired Collection Fandek
- > Reflective Collection Fandek
- > 747 Discover Collection Fandek
- > Colors of Greece Collection

## BIOCLIMA® – Durable Color for Building Performance

In building insulation and façade systems, color must maintain stability under demanding environmental conditions. BIOCLIMA® integrates coating technologies that ensure color durability, resistance to weathering and compatibility with thermal insulation systems, allowing architects and engineers to combine energy efficiency with long-term aesthetic performance.

- > BIOCLIMA® ClimaTop Facade Collection Fandek

# sustainability

Sustainability is integrated into every stage of our operations, which are powered with photovoltaics that cover over 60% of the facilities needs.

Our priorities include:

## **Circular Economy**

Developing inks and coatings compatible with recyclable packaging structures and compliant with emerging regulations.

## **Responsible Manufacturing**

Investing in energy-efficient facilities and environmental management systems.

## **Sustainable Products**

Developing solutions such as recyclable packaging technologies and energy-saving building systems.

# quality & certifications

The Group operates according to internationally recognized standards:

- > ISO 9001 – Quality Management
- > ISO 14001 – Environmental Management
- > ISO 45001 – Occupational Health & Safety
- > ISO 50001 – Energy Management
- > ISO 14064 – GHG Emissions
- > EMAS Environmental System in both the Chalkida [EK9.1] & Aspropyrgos Sites

The Group has also received Ecovadis sustainability ratings, confirming its commitment to responsible business practices.

# industry memberships & professional networks

Collaborating to Shape Industry Standards

DRUCKFARBEN Group actively participates in international industry organizations, research networks and professional initiatives. Through these collaborations, the Group contributes to the development of regulatory frameworks, technological innovation and sustainable industry practices.

- > EuPIA - European Printing Ink Association
- > CEFLEX - Circular Economy for Flexible Packaging Initiative
- > GRA - Global Rotogravure Association
- > HPPA - Hellenic Paper Packaging Association
- > BASF PreThink Ink Network
- > NOVA Institute - Group of the world's leading independent paint manufacturers
- > CEPE - European Council of the Paint, Printing Ink and Artists' Colours Industry
- > HCA - Hellenic Coatings Association
- > BIM - Building Information Modeling initiatives and networks supporting digital construction and building design
- > CSR Hellas
- > Hellenic Institute of Customer Service
- > Diversity Charter Greece

Participation in these organizations allows DRUCKFARBEN Group to remain closely aligned with emerging technologies, sustainability initiatives and regulatory developments, ensuring that our products meet the evolving needs of global markets.

# outlook

Our strategy focuses on three key pillars:

- > Innovation – Developing high-performance and sustainable products.
- > International Expansion – Strengthening our presence in key regional markets.
- > Partnership – Supporting customers with technical expertise, regulatory guidance and customized solutions.

As industries evolve toward greater sustainability, innovation and efficiency, DRUCKFARBEN Group remains committed to investing in research, people and responsible manufacturing.

Guided by strong values and a forward-looking vision, we continue to work alongside our partners to develop solutions that bring color, performance and sustainability to support the next generation of packaging, spaces and buildings.
