---

KRAFT Paints holds an important position in the Market of architectural paints, varnishes, repairing materials, waterproofing solutions & external thermal insulation systems. Investing in the formation of new, modern & automated mortar production unit, at its facilities in Athens (Greece), continues to support the Building Constructions & Renovations Sector, by offering certified, innovative products and complete technical solutions.

KRAFT Paints presents the new product family of tile adhesives: FixoTile, for a wide range technical applications.

# FLEXIBLE TILE ADHESIVE FOR DEMANDING PROJECTS

## FixoTile Flex 30

Flexible, high-performance, polymer-modified, cement-based white tile adhesive

Enriched with selected vinyl and acrylic copolymer resins that offer enhanced adhesion, elastic deformation and characteristic moisture resistance. Contains natural hydraulic recycled binders (Recycled Green Technology) and inorganic modified phyllosilicate additives which improve workability, ensure zero slip and extended open time.

Suitable for fixing absorbent and non-absorbent, small & large size decorative tiles (e.g. granite, natural stone, glass tiles, ceramics etc.) on floors or walls. Can be applied on a variety of substrates. Ideal for areas where high flexibility, adhesion and moisture resistance are required, such as: roofs, balconies, swimming pools, underfloor heating, bathrooms, industrial areas, surfaces with intense & heavy traffic (shopping centers, hotels, parking lots, schools, etc.).

- High adhesion & moisture resistance
- Great capacity for elastic deformation
- Ideal for large size tiles
- Compatible with flexible cementitious waterproofing membranes (EN 14891)
- Excellent workability & thixotropy
- Zero slip
- Extended open time
- Indoor & outdoor usage
- Packages: 25Kg & 5Kg

It is classified as type C2TES1 tile adhesive according to EN 12004.

**SAFE &  
RELIABLE  
ADHESION**

## FixoTile Ultra 20

High-performance,  
polymer-modified,  
cement-based  
white tile adhesive

Enriched with selected vinyl copolymer resins that offer enhanced adhesion and moisture resistance. The combination of modified cellulose and appropriate graded aggregate granulometry ensures zero slip and extended open time.

Suitable for fixing absorbent and non-absorbent, small & large size decorative tiles (e.g. granite, natural stone, ceramics, etc.) on floors or walls. Ideal for areas where high adhesion and moisture resistance are required.

It can be placed on a variety of substrates such as: concrete, cement mortars, renders & masonry mortars, painted walls, dry construction (gypsum boards, cement boards, etc.), surfaces with existing and well anchored overlays of: tiles, marbles, mosaics.

- High adhesion & moisture resistance
- Excellent workability & thixotropy
- Zero slip
- Extended open time
- Indoor & outdoor usage
- Packages: 25Kg & 5Kg

It is classified as type C2TE tile adhesive according to EN 12004.

# ECONOMICAL & SAFE ADHESIVE CHOICE FOR CERAMIC TILES

## FixoTile Pro 10

Cement-based  
white adhesive  
for ceramic tiles

Enriched with selected resins that offer adhesion and moisture resistance. The combination of modified inorganic additives and appropriate graded aggregate granulometry ensures zero slip and extended open time.

Suitable for fixing decorative ceramic tiles on floors or walls. Ideal for small & medium size tiles. It can be placed on substrates of: concrete, cement mortars, renders & masonry mortars.

- High adhesion & moisture resistance, on usual substrates
- Excellent workability & thixotropy
- Zero slip
- Extended open time
- Indoor & outdoor usage
- Packages: 25Kg & 5Kg

It is classified as type C1TE tile adhesive according to EN 12004.
