| Accor | Safety Data Sheet ding to Annex II to REACH - Regulation 2015/830 | |
| | | taking |
| SECTION 1. Identification of the sub | stance/mixture and of the company/under | laking |
| 1.1. Product identifier Code: Product name | CK322430216 KRAFT WOOD CLASS | |
| 1.2. Relevant identified uses of the substance or r Intended use | nixture and uses advised against | |
| 1.3. Details of the supplier of the safety data shee Name | t DRUCKFARBEN HELLAS SA | |
| Full address District and Country | Megaridos Ave 193 00 Aspropyrgos (Attiki) Greece | |
| | Tel. +30 210 5519500 | |
| | Fax +30 210 5519501 | |
| e-mail address of the competent person | | |
| responsible for the Safety Data Sheet | psafety@druckfarben.gr | |
| 1.4. Emergenou telephone number | | |
| 1.4. Emergency telephone number For urgent inquiries refer to | +30 210 7793777 | |
| SECTION 2. Hazards identification | | |

2.1. Classification of the substance or mixture

The product is classified as hazardous pursuant to the provisions set forth in (EC) Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of (EU) Regulation 2015/830. Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

| Hazard classification and indication: | | |
|--|------|--|
| | | |
| Flammable liquid, category 3 | H226 | Flammable liquid and vapour. |
| Aspiration hazard, category 1 | H304 | May be fatal if swallowed and enters airways. |
| Specific target organ toxicity - single exposure, category 3 | H336 | May cause drowsiness or dizziness. |
| Hazardous to the aquatic environment, chronic toxicity, | H412 | Harmful to aquatic life with long lasting effects. |
| category 3 | | |
| | | |

2.2. Label elements

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

Hazard pictograms:

The full wording of hazard (H) phrases is given in section 16 of the sheet.

SECTION 4. First aid measures

4.1. Description of first aid measures

Revision nr. 8

Dated 30/10/2020 Printed on 30/10/2020

KRAFT WOOD CLASS

Page n. 4/17

Replaced revision:7 (Dated: 23/02/2018)

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention immediately. Wash contaminated clothing before using it again.

INHALATION: Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical advice/attention immediately. INGESTION: Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything not explicitly authorised by a doctor.

4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

4.3. Indication of any immediate medical attention and special treatment needed

Information not available

SECTION 5. Firefighting measures

5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT

Extinguishing substances are: carbon dioxide, foam, chemical powder. For product loss or leakage that has not caught fire, water spray can be used to disperse flammable vapours and protect those trying to stem the leak.

UNSUITABLE EXTINGUISHING EQUIPMENT

Do not use jets of water. Water is not effective for putting out fires but can be used to cool containers exposed to flames to prevent explosions.

5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

Excess pressure may form in containers exposed to fire at a risk of explosion. Do not breathe combustion products.

5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

SECTION 6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

Send away individuals who are not suitably equipped. Use explosion-proof equipment. Eliminate all sources of ignition (cigarettes, flames, sparks, etc.) from the leakage site.

6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

Revision nr. 8

Dated 30/10/2020

KRAFT WOOD CLASS

Printed on 30/10/2020 Page n. 5/17

Replaced revision:7 (Dated: 23/02/2018)

6.3. Methods and material for containment and cleaning up

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material.

Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

SECTION 7. Handling and storage

7.1. Precautions for safe handling

Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Without adequate ventilation, vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid bunching of electrostatic charges. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat. Avoid leakage of the product into the environment.

7.2. Conditions for safe storage, including any incompatibilities

Store only in the original container. Store in a cool and well ventilated place, keep far away from sources of heat, naked flames and sparks and other sources of ignition. Keep containers away from any incompatible materials, see section 10 for details.

7.3. Specific end use(s)

Information not available

SECTION 8. Exposure controls/personal protection

8.1. Control parameters

VND = hazard identified but no DNEL/PNEC available ; NEA = no exposure expected ; NPI = no hazard identified.

8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice.

Personal protective equipment must be CE marked, showing that it complies with applicable standards.

HAND PROTECTION

Protect hands with category III work gloves (see standard EN 374).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

Consider the appropriateness of providing antistatic clothing in the case of working environments in which there is a risk of explosion.

EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

Revision nr. 8

Dated 30/10/2020

KRAFT WOOD CLASS

Printed on 30/10/2020 Page n. 8/17

Replaced revision:7 (Dated: 23/02/2018)

RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, use a mask with a type A filter whose class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.

ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

SECTION 9. Physical and chemical properties

SECTION 10. Stability and reactivity

10.1. Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

10.2. Chemical stability

The product is stable in normal conditions of use and storage.

2-ethylhexanoic acid, zirconium salt

SADT = 210°C/410°F.

10.3. Possibility of hazardous reactions

The vapours may also form explosive mixtures with the air.

xylene (mixture of isomers)

XYLENE (MIXTURE OF ISOMERS): stable, but may develop violent reactions in the presence of strong oxidising agents such as sulphuric and nitric acids and perchlorates. May form explosive mixtures with the air.

10.4. Conditions to avoid

Avoid overheating. Avoid bunching of electrostatic charges. Avoid all sources of ignition.

10.5. Incompatible materials

Information not available

10.6. Hazardous decomposition products

In the event of thermal decomposition or fire, gases and vapours that are potentially dangerous to health may be released.

SECTION 11. Toxicological information

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification.

It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

11.1. Information on toxicological effects

xylene (mixture of isomers)

XYLENE (MIXTURE OF ISOMERS): has a toxic effect on the CNS (encephalopathies). Irritating to the skin, conjunctivae, cornea and respiratory apparatus.

Metabolism, toxicokinetics, mechanism of action and other information

Information not available

Revision nr. 8

Dated 30/10/2020 Printed on 30/10/2020

Page n. 12/17

Replaced revision:7 (Dated: 23/02/2018)

| iodo-2-propynyl butylcarbamate | |
|---|--|
| _C50 - for Fish | 0,067 mg/l/96h |
| EC50 - for Crustacea | 0,16 mg/l/48h |
| EC50 - for Algae / Aquatic Plants | 0,022 mg/l/72h |
| ethyl methyl ketone oxime | |
| _C50 - for Fish | 843 mg/l/96h |
| EC50 - for Crustacea | 750 mg/l/48h |
| EC50 - for Algae / Aquatic Plants | 83 mg/l/72h |
| Hydrocarbons, C9-C11, n-alkanes, soalkanes, cyclics, <2% aromatics _C50 - for Fish | > 100 mg/l/96h Fish / Aquatic Invertebrates / Algae / Microorganisms |
| EC50 - for Crustacea | > 100 mg/l/48h |
| EC50 - for Algae / Aquatic Plants | > 100 mg/l/72h |
| Chronic NOEC for Fish | > 0,1 mg/l |
| Chronic NOEC for Crustacea | > 0,1 mg/l |
| xylene (mixture of isomers) | |
| _C50 - for Fish | > 100 mg/l/96h Microorganisms |
| 2-ethylhexanoic acid, zirconium salt | |
| _C50 - for Fish | > 100 mg/l/96h Danio rerio |
| EC50 - for Algae / Aquatic Plants | 49,3 mg/l/72h Desmodesmus subspicatus |
| Naphthalene | |
| _C50 - for Fish | > 1 mg/l/96h Theoretical |
| _C10 for Fish | > 1 mg/l/96h Theoretical |
| 2. Persistence and degradability | |
| 3-iodo-2-propynyl butylcarbamate | |
| Rapidly degradable | |
| ethyl methyl ketone oxime | |
| Degradability: information not available | |
| Hydrocarbons, C9-C11, n-alkanes, soalkanes, cyclics, <2% aromatics Rapidly degradable | |
| xylene (mixture of isomers) | |
| Rapidly degradable | |
| 2-ethylhexanoic acid, zirconium salt | |
| Solubility in water | < 0,1 mg/l |

| KRAFT – | DRUCKFARBEN HELLAS SA | Revision nr. 8 Dated 30/10/2020 |
|--|-----------------------|---|
| | | Printed on 30/10/2020 |
| DAINTS | KRAFT WOOD CLASS | Page n. 13/17 |
| ΡΑΙΝΤΣ | | Replaced revision:7 (Dated: 23/02/2018) |
| Rapidly degradable | | |
| 2,6-di-tert-butyl-p-cresol | | |
| Degradability: information not available | | |
| 2.3. Bioaccumulative potential | | |
| 3-iodo-2-propynyl butylcarbamate | | |
| Partition coefficient: n-octanol/water | 2,81 | |
| ethyl methyl ketone oxime | | |
| Partition coefficient: n-octanol/water | 0,59 | |
| BCF | 5 | |
| 2,6-di-tert-butyl-p-cresol | | |
| Partition coefficient: n-octanol/water | 5,1 Log Kow | |
| BCF | < 1800 | |
| 12.4. Mobility in soil | | |
| nformation not available | | |
| I2.5. Results of PBT and vPvB assessment | | |

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0,1%.

12.6. Other adverse effects

Information not available

SECTION 13. Disposal considerations

13.1. Waste treatment methods

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations. Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

Waste transportation may be subject to ADR restrictions.

CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

SECTION 14. Transport information

14.1. UN number

ADR / RID, IMDG, 1263 IATA:

14.2. UN proper shipping name

ADR / RID:

PAINT or PAINT RELATED MATERIAL

KRAFT WOOD CLASS

Revision nr. 8

Dated 30/10/2020 Printed on 30/10/2020

Page n. 14/17

Replaced revision:7 (Dated: 23/02/2018)

IMDG: IATA: PAINT or PAINT RELATED MATERIAL

PAINT or PAINT RELATED MATERIAL

14.3. Transport hazard class(es)

| ADR / RID: | Class: 3 | Label: 3 |
|------------|----------|----------|
| IMDG: | Class: 3 | Label: 3 |
| IATA: | Class: 3 | Label: 3 |

14.4. Packing group

ADR / RID, IMDG, III IATA:

14.5. Environmental hazards

| ADR / RID: | NO |
|------------|----|
| IMDG: | NO |
| IATA: | NO |

14.6. Special precautions for user

| ADR / RID: | HIN - Kemler: 30 Special Provision: - | Limited Quantities: 5 L | Tunnel restriction code: (D/E) |
|------------|--|------------------------------------|--------------------------------------|
| IMDG: | EMS: F-E, <u>S-E</u> | Limited Quantities: 5 I | |
| IATA: | Cargo: | – Maximum quantity: 220 L | Packaging instructions: 366 |
| | Pass.: | Maximum quantity: 60 L | Packaging instructions: 355 |
| | Special Instructions: | A3, A72, A192 | |

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code

Information not relevant

SECTION 15. Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Seveso Category - Directive 2012/18/EC: P5c

Restrictions relating to the product or contained substances pursuant to Annex XVII to EC Regulation 1907/2006

KRAFT WOOD CLASS

Revision nr. 8

Dated 30/10/2020 Printed on 30/10/2020

Page n. 15/17

Replaced revision:7 (Dated: 23/02/2018)

Product Point

3 - 40

Substances in Candidate List (Art. 59 REACH)

On the basis of available data, the product does not contain any SVHC in percentage greater than 0,1%.

Substances subject to authorisation (Annex XIV REACH)

None

Substances subject to exportation reporting pursuant to (EC) Reg. 649/2012:

None

Substances subject to the Rotterdam Convention:

None

Substances subject to the Stockholm Convention:

None

Healthcare controls

Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected.

15.2. Chemical safety assessment

A chemical safety assessment has not been performed for the preparation/for the substances indicated in section 3.

SECTION 16. Other information

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

| Flam. Liq. 3 | Flammable liquid, category 3 |
|-----------------|--|
| Carc. 2 | Carcinogenicity, category 2 |
| Repr. 2 | Reproductive toxicity, category 2 |
| Acute Tox. 4 | Acute toxicity, category 4 |
| Asp. Tox. 1 | Aspiration hazard, category 1 |
| STOT RE 2 | Specific target organ toxicity - repeated exposure, category 2 |
| Eye Dam. 1 | Serious eye damage, category 1 |
| Eye Irrit. 2 | Eye irritation, category 2 |
| Skin Irrit. 2 | Skin irritation, category 2 |
| STOT SE 3 | Specific target organ toxicity - single exposure, category 3 |
| Skin Sens. 1 | Skin sensitization, category 1 |
| Skin Sens. 1B | Skin sensitization, category 1B |
| Aquatic Acute 1 | Hazardous to the aquatic environment, acute toxicity, category 1 |

Dated 30/10/2020 Printed on 30/10/2020

Page n. 16/17

Replaced revision:7 (Dated: 23/02/2018)

| Aquatic Chronic 1 | Hazardous to the aquatic environment, chronic toxicity, category 1 |
|-------------------|--|
| Aquatic Chronic 2 | Hazardous to the aquatic environment, chronic toxicity, category 2 |
| Aquatic Chronic 3 | Hazardous to the aquatic environment, chronic toxicity, category 3 |
| H226 | Flammable liquid and vapour. |
| H351 | Suspected of causing cancer. |
| H361d | Suspected of damaging the unborn child. |
| H302+H332 | Harmful if swallowed or if inhaled. |
| H302 | Harmful if swallowed. |
| H312 | Harmful in contact with skin. |
| H332 | Harmful if inhaled. |
| H304 | May be fatal if swallowed and enters airways. |
| H373 | May cause damage to organs through prolonged or repeated exposure. |
| H318 | Causes serious eye damage. |
| H319 | Causes serious eye irritation. |
| H315 | Causes skin irritation. |
| H335 | May cause respiratory irritation. |
| H317 | May cause an allergic skin reaction. |
| H336 | May cause drowsiness or dizziness. |
| H400 | Very toxic to aquatic life. |
| H410 | Very toxic to aquatic life with long lasting effects. |
| H411 | Toxic to aquatic life with long lasting effects. |
| H412 | Harmful to aquatic life with long lasting effects. |
| EUH066 | Repeated exposure may cause skin dryness or cracking. |

LEGEND:

- ADR: European Agreement concerning the carriage of Dangerous goods by Road
- CAS NUMBER: Chemical Abstract Service Number
- CE50: Effective concentration (required to induce a 50% effect)
- CE NUMBER: Identifier in ESIS (European archive of existing substances)
- CLP: EC Regulation 1272/2008
- DNEL: Derived No Effect Level
- EmS: Emergency Schedule
- GHS: Globally Harmonized System of classification and labeling of chemicals
- IATA DGR: International Air Transport Association Dangerous Goods Regulation
- IC50: Immobilization Concentration 50%
- IMDG: International Maritime Code for dangerous goods IMO: International Maritime Organization
- INDEX NUMBER: Identifier in Annex VI of CLP
- LC50: Lethal Concentration 50%
- LD50: Lethal dose 50%
- **OEL: Occupational Exposure Level**
- PBT: Persistent bioaccumulative and toxic as REACH Regulation
- PEC: Predicted environmental Concentration
- PEL: Predicted exposure level
- PNEC: Predicted no effect concentration
- REACH: EC Regulation 1907/2006
- RID: Regulation concerning the international transport of dangerous goods by train
- TLV: Threshold Limit Value
- TLV CEILING: Concentration that should not be exceeded during any time of occupational exposure.
- TWA STEL: Short-term exposure limit
- TWA: Time-weighted average exposure limit
- VOC: Volatile organic Compounds
- vPvB: Very Persistent and very Bioaccumulative as for REACH Regulation
- WGK: Water hazard classes (German).

- Note for users:

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses.

Provide appointed staff with adequate training on how to use chemical products.

Product's classification is based on the calculation methods set out in Annex I of the CLP Regulation, unless otherwise indicated in sections 11 and 12. The data for evaluation of chemical-physical properties are reported in section 9.
